

Workshop Degreaser

General Purpose Heavy Duty Degreaser

Powerful cleaning action

Long life and low odour

Excellent for parts washers

Rinses easily with water

Safe for use in confined spaces

Introduction

Workshop Degreaser is a safe and effective alternative to petroleum solvent based degreasers for the removal of grease and oil from most surfaces. It is also effective in parts washers. It has a Low odour, and long life due to its capacity for holding oil and grease. Easy to use and very safe, it is ideal for degreasing hard to get at places. Workshop degreaser also provides excellent initial lubricity where bearings are being cleaned

Directions for use

Use Workshop degreaser as supplied, by either spraying or swabbing onto contaminated areas. Work into grease with a brush then allow to react for 30 seconds. Wipe off with a clean cloth, or rinse off with water.
For parts washers, simply clean out the unit then fill with Workshop Degreaser.
Do not mix with other degreasers.

Safety

This product is considered to be very safe for use, and of low impact to the environment
