

Hand Sanitizer

Eco Friendly Hand Sanitizing Spray / Foam

Excellent antimicrobial
properties

Organic sanitizer for safe
effective on skin

Pleasant fresh fragrance

Contains antioxidants and skin
conditioners

Non toxic and
environmentally acceptable

Introduction

Hand Sanitizer is a breakthrough in post wash hand sanitizing, offering fully organic ingredients with a natural fresh fragrance. Hand Sanitizer is a low alcohol formulation providing excellent coverage of all hand areas, it is quick drying, and no alcohol related problems such as drying of skin or inhalation of alcohol fumes.

Hand Sanitizer is very effective against a wide range of microbial organisms commonly found on hands, and not only quickly reduces the number of organisms to a safe level, but helps protect hands for several hours after application.

Hand Sanitizer also contains powerful antioxidants and skin conditioners to help protect skin from the harsh environment of day to day activities.

Hand Sanitizer is easy to use and can be dispensed through a pump, spray or foam applicator making it a very versatile product.

Directions for use

Hand Sanitizer comes in a ready to use form. Simply apply using a hand atomizing spray bottle, foam dispenser, or just pour a little into palm of hand. Rub well into hard to reach areas such as between fingers, around knuckles and finger nails then allow a few seconds to dry. Hand Sanitizer is completely non toxic and non intoxicating making it ideal for use in food handling areas and industries where drug and alcohol testing is mandatory.
