

Smell-E-Clean

Organic Cleaner Sanitizer

Effective broad spectrum antimicrobial action

Neutralizes odors rapidly and completely

Safe to use around pets and children

Based on the latest bioflavonoid antimicrobial technology

Non toxic and biodegradable – Safe to use and low environmental impact

Introduction

Smell-E-Clean is an organic based formulation designed to clean, sanitize and deodorize in one operation. Built with the latest bioflavonoid disinfection technology combined with the proven odor controlling properties of Odor Gone, Smell-E-Clean will remove soils from all surfaces, neutralize any odors present, and leave a sanitized surface safe for human contact.

Smell-E-Clean is ideal for cleaning up human and pet excrement, sewerage leaks or spills, and any other offensive discharges that may present risk to humans.

Smell-E-Clean is safe to use around children, pets, and food areas, and is ideal as a spray and wipe to replace formulations based on traditional toxic QAC's.

Directions for use

As a spray & Wipe dilute 1 part to 80 parts water. For disinfection dilute 1 part to 10 parts water. Pick up bulk solids first, then simply spray over affected area and wipe clean.

Safety

This product is considered to be very safe for use, and of low impact to the environment
